# About Us

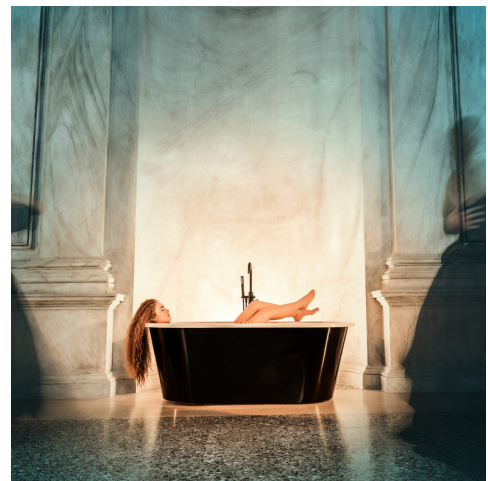

Aquaart is a bathroom furniture brand by the company Ferrotehna Ltd.

The company is founded in 1995. We are located in the very heart of Kvarner, in the northern part of the Adriatic Sea, the unreal beauty of which provides us with endless inspiration over and over again. It is a meeting point between the river and the sea, a place where our closeness to water is engraved on the rocks.

This is where we combine long experience, production know-how, and love for innovation to create cutting-edge products.

In our wide range of products, we offer bathroom furniture, bathtubs and trays, shower cabins, and bathroom accessories.

For more information about our products and cooperation, visit our websites [www.aquaart-bathrooms.com](http://www.aquaart-bathrooms.com) and [www.ferrotehna.com](http://www.ferrotehna.com).

# Mirage

A sophisticated design is blending harmoniously with the subtle form of a washbasin made of artificial marble. The 120 cm wide cabinet provides a lot of storage space. User-friendliness is not compromised with intelligent solutions such as a hidden inner drawer that gently and quietly opens and closes with just a light pull and push.

# Mirage

Modular side cabinets can be combined and adapted to each space and its requirements. One of the side cabinets is equipped with glass shelves and inner deep door shelves. Module with glass shelves is a nice addition and display for various bathroom accessories. This minimal design will fit nicely in any modern bathroom.

# Hip

This modular composition is a perfect fit for your bathroom.

Hip consists of a top (width from 60 to 160 cm), upper and lower modules (widths 60, 80, and 100 cm), and side cabinets.

It offers various combinations with the modules that can incorporate a sink and adapt to each space.
